

16th June 2022 IMPORTANT INFORMATION FOR PARENTS/CARERS

Dear parents/carers

We have had a rise in cases of chicken pox over the last week. Please keep an eye on your children for any signs of infections, e.g. a sudden fever, runny nose, cough, and a generalised rash. The rash starts with blisters which then scab over.

Click on the link to the NHS with information about chicken pox.

<https://www.nhs.uk/conditions/chickenpox/?src=conditionswidget>

Please do take time to look at the information.

Please also remember to follow good hand hygiene – washing and sanitising as this does help prevent the spread of viruses and infections.
